### July 2022

# Europe's leader in sustainable indoor climate comfort solutions

We manufacture and distribute globally from over **20** locations to customers in **50+** countries.

Comfort delivered is our promise to all our stakeholders. It is all about our dedication and our ability to deliver. About listening and responding to the needs of our personnel, our customers and end-users.

Purmo Group delivers comfort by doing things smarter, by always moving forward and by staying ahead of the competition.

**We deliver comfort by:**

- Enabling our people to flourish, ensuring their safety at all times
- Designing inspiring products that are accessible to the many
- Always placing our customers at the centre
- Keeping an eye on the future to ensure the sustainability of our business

**We are Purmo Group – Comfort delivered.**

A person is lying on their back on a light-colored rug in a room. A large window in the background shows greenery outside. A colorful geometric graphic, consisting of a yellow and green shape, is overlaid on the right side of the image. The text "Our promise" is in the top left, "Comfort delivered" is in the top center, and "Comfort" is in the bottom center.

Our promise

# Comfort delivered

The indoors. The place where we spend so much time – learning, sleeping, relaxing, sharing. It's where we live. That's why a healthy and comfortable indoor climate is so important. But in a world facing climate challenges, unprecedented population growth and a need to use resources better, ensuring sustainability is paramount.

Committed to innovation, we take a system and solution approach to delivering optimal heating offers the highest levels of comfort and energy efficiency. With our complete range and expert knowledge, we can help you find exactly the right solution. So, let's work together and create innovative solutions that will meet tomorrow's indoor climate challenges today. Let's advance indoor climates as we know them.

**Let's create the great indoors.**

# Comfort

# Our trade brand house

Our commercial brand house is an overview of our vision and customer promise. The four brand pillars demonstrate how we plan to achieve this and define the change we want to drive.

Improve efficiency

**Optimising  
energy  
efficiency**  
through  
system  
accuracy

Better integration

Let's  
**integrate  
solutions**  
in innovative  
systems  
for better  
performance

Work smarter

Let's work  
together  
and **work  
smarter**

Reduce footprint

Let's focus  
on the full  
product life  
cycle and  
**reduce  
impact on  
our climate**

# Add a little colour to your life

A little bit of colour can magically brighten up a room and what better way to complement an interior decor than with a colourful radiator? We offer an extensive range of colours for our Slieve, Adagio, Forza, Plaza, Topaz and Pearl ranges and deliver within 6-8 weeks of ordering.

## Colours for style and choice

Selected to complement the stylish design of our radiators, our colours reflect the beauty of contemporary trends like a breath of warm air.

From our sleek Champagne to our shimmering Matt Charcoal, our colours are extraordinary.

Do we need to update this page to include mention of figuresse colours?

## Coloured radiators held in stock

We understand that sometimes time is of the essence.

To help you, we stock a selection of the most popular sizes and colours.

For stocked colour pricing, please refer the product pages.

## Connection Options

NA = 50mm less than overall height

Suitable for Bottom Opposite End (BOE), Top Bottom Same End (TBSE) and Top Bottom Opposite Ends (TBOE). 4 x 1/2" BSP tappings.

All Compact radiators:

Test Pressure 10.5 bar.

Max operating pressure 8 bar.

# LST

The Purmo LST Radiator consists of a panel radiator and a highly durable anti bacterial powder coated outer casing, manufactured from 1.2mm steel. The outer casing prevents contact with the hot surface of the radiator and also covers pipework. Surface temperatures are below 43°C with water inlet temperatures up to 82°C in accordance with NHS Estates Guidance Note 'Safe Hot Water and Surface Temperatures, 1998'. The robust outer casing can easily be removed to allow access for regular cleaning, maintenance and decorating.

The Purmo LST Radiator is particularly favoured for installation in nurseries, hospitals, nursing homes, sheltered housing and high-risk areas in the home.

- Available in three heights **572mm, 672mm and 872mm**
- Available in lengths from **420mm to 2000mm**
- Available as single panel, single convector (T11) and double panel, double convector (T22)

## Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty for both the casing and radiator
- Manufactured and tested to BS EN 442

## Installation

looking towards wall

\*60mm for the 420mm wide version.

LST type 11 elevation

LST type 22 side elevation

	enclosure height A (mm)		
	572	672	872
emitter height - B (mm)	300	400	600

**Important:** It is advisable to leave a further 5mm clearance above any final floor covering to allow for easy fitting and removal.

## Control Options

A range of Purmo thermostatic radiator valves is available enabling the temperature of individual rooms to be automatically and precisely controlled.

### Close Coupled Thermostatic Radiator Valve

The close coupled TRV Kit is suitable for the BOE connection, offering a choice of positions for both the valve body and the sensor head. The kit allows the thermal sensing head of a Purmo TRV to be mounted directly on the top left or top right of the casing. The point of fixing in the casing side has been semi-punched to allow it to be easily knocked out. The body of the valve is fitted to the emitter, and is coupled to the sensor head by means of a flexible capillary lead.

- The Universal Kit comprises:
- 1 TRV head & limit pins
  - 1 ½" 15mm straight body
  - 1 LST capillary unit
  - 1 Head locating body
  - 1 ½" 15mm Fullflow straight lockshield valve
  - 2 Integration elbows

To Order: UNICCKTCP

### Direct Fit TRV Kit (Cannot be used with 420mm wide radiator)

The Direct Fit TRV Kit is suitable for TBOE connection only, and allows a Purmo TRV body to be fitted directly to the emitter with the thermostatic head projecting through the casing.

- The Kit comprises:
- 1 Horizontal angle TRV body
  - 1 TRV head
  - 1 Extension adaptor
  - 1 Plastic bush
  - 1 Matchmaster lockshield valve

To Order: DIRECTFIT

DIRECT FIT TRV

### Remote Sensor

The Remote Sensor is suitable for BOE connections only. This allows the fitting of a Purmo TRV inside the casing with the sensor being located up to 5m away.

To Order: TRVRSHEAD5 (5m) / TRVRSHEAD2 (2m)

REMOTE SENSOR

### Remote Adjuster

The Remote Adjuster enables the Purmo TRV head / sensor to be wall mounted up to 5m away from the radiator and is suitable for both TBOE and BOE connections.

To Order: TRVADJHEAD5 (5m) / TRVADJHEAD2 (2m)

REMOTE ADJUSTER

# COMPLA HORIZONTAL

Compla Horizontal is a premium panel radiator. Stylish and modern, with the technological benefits of a Compact radiator, Compla Horizontal gives the perfect combination of design appearance and performance.

- Available in four heights **300mm, 400mm, 500mm and 600mm**
- Available in nine lengths from **400mm to 2000mm**
- Available as single panel, single convector (T11) and double panel, double convector (T22)

## Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty
- Manufactured and tested to BS EN 442

## Accessories

**1. Universal floor fixing bracket**

4 x 1/2" BSP tapings. Suitable for Bottom Opposite End (BOE). Top Bottom Opposite Ends (TBOE) and Top Bottom Same End (TBSE).

All Ligna radiators:

Test Pressure 13 bar.

Max operating pressure 10 bar.

# LIGNA VERTICAL

Ligna Vertical is a modern twist on a traditional panel radiator, with a lined effect adding style to substance. Available in a variety of sizes. Easy to clean, robust and comes with pre-fitted curved side panels without compromising top-quality performance.

- Available in two heights of **1800mm and 1950mm**
- Available in four lengths from **300mm to 750mm**
- Available in **Type 22 only**

## Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Full 10-year warranty
- Manufactured and tested to BS EN 442

All Ligna Vertical Radiators: Test Pressure: 8 bar Max Operating Pressure: 6 bar

# UNDERFLOOR HEATING

---

Why underfloor heating?

## **Comfort Delivered**

Heat is provided from the floor up providing optimum comfort conditions.

## **Effective Heating**

The majority of the output is radiant, which is very effective even at slightly lower temperatures.

## **System Efficiency**

A reduction in air movement results in efficiently heating the space we live in rather than having high temperatures above head height.

## **Temperature Control**

Greater temperature accuracy can be achieved due to having individual thermostats controlling each room.

## **Design Freedom**

Underfloor heating turns the floor area into a heat emitter therefore giving complete design freedom of wall space.

# FIXING SYSTEMS

Purmo offer a range of fixing systems that are ideal for smaller areas, extensions or even refurbishments.

Applications	Clips	Cliprail	Low Profile	Plated	Cement Board

Slieve single horizontal in matt charcoal

Slieve Horizontal - Single Panel H10 & Single Panel Single Convactor H11				
Radiator height (mm)	433	505	578	723
Water content (L/m)	4.01	4.8	5.61	6.84
Fin height (mm)	360	433	505	650

Slieve Horizontal - Double Panel H20, Double Panel Single Convector H21 & Double Panel Double Convector H22					
Radiator height (mm)	288	433	505	578	723
Water content (L/m): H20, H21	4.67	6.31	7.80	9.31	12.04
Water content (L/m): H22	4.90	7.31	8.50	9.71	12.21
Fin height (mm)	288	360	433	505	650

**Note:** the distance between the connection centres equals the length of radiator.

Slieve Vertical - Single Panel V10			
Radiator height (mm)	1600	1800	2000
Water content per element/tube (L)	0.95	1.03	1.16

Slieve Vertical - Double Panel V20			
Radiator height (mm)	1600	1800	2000
Water content per element/tube (L)	1.89	2.13	2.36

Vertical Slieves have a factory fitted centre baffle as standard in the bottom header for Bottom Opposite End (BOE) installation only.  
Horizontal Slieves are supplied without baffles and cannot be installed Top Bottom Same End (TBSE). All tappings ½" BSP.

All Slieve Radiators: Test Pressure: 5.2 bar Max Operating Pressure: 4 bar

# ADAGIO

Adagio goes beyond a traditional column radiator with its flat panels in 35mm and 70mm widths. Available in horizontal and vertical designs, its clean lines and sleek finish guarantees style in any room. Choose from single or double columns.

## Adagio 35 - Horizontal

- Available in one standard height of **600mm**
- Available in five lengths from **630mm to 1995mm**
- Available in **single and double** flat columns

## Adagio 35 - Vertical

- Available in one standard height of **1800mm**
- Available in four lengths from **420mm to 630mm**
- Available in **single** flat column only

## Adagio 70 - Vertical

- Available in two heights from **1800mm and 2000mm**
- Available in six widths from **320mm to 680mm**
- Available in **single and double** flat columns

## Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Available in our 9 colours
- Full 10-year warranty
- Manufactured and tested to BS EN 442

# FORZA

Forza combines a traditional look with innovative technology. Sleek and classic in its design, this multi-column radiator comes with double, triple or quadruple columns.

## Horizontal

- Available in four heights from **300mm to 750mm**
- Available in seven lengths from **552mm to 1610mm**
- Available in **2, 3 and 4 columns**

## Vertical

- Available in two heights of **1800mm and 2000mm**
- Available in three lengths from **332mm to 598mm**
- Available in **2 and 3 columns**

## Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Available in our 9 colours (6-8 week lead time)
- Supplied with 1/2" BSP flow diverter to reduce "warm up" time when installed Bottom Opposite End (BOE)
- Full 10-year warranty
- Manufactured and tested to BS EN 442

Forza 2 column vertical in anthracite

Forza 2 column vertical in champagne

### Optional Forza Foot

Order code	Description	List Price (Excl. VAT)	List Price (Inc. VAT)
<b>QMCF1</b>	<b>FORZA Foot 90-120 - white</b>	<b>£37.84</b>	<b>£45.41</b>
QMCF1RAL	FORZA Foot 90-120 - coloured	£47.28	£56.74
<b>QMCFC1</b>	<b>FORZA Foot cover - white</b>	<b>£9.44</b>	<b>£11.33</b>

Feet are sold as single unit. Only available for radiators up to 500mm high. Indicate quantity at time of order.  
Feet covered by a 2-year warranty.

Forza radiators are supplied with 1/2" BSP flow diverter to reduce "warm up" time when installed Bottom Opposite End (BOE). Cannot be installed Top Opposite End (TOE). For full width, add 26mm to the width of the radiator indicated in the pricing tables.

All Forza Radiators: Test Pressure: 13 bar Max Operating Pressure: 10 bar

# PLAZA

Plaza is our contemporary tube-on-tube feature radiator. A vertical design perfect for any room, giving your home designer aesthetics without losing high-quality heat outputs.

- Available in two heights of **1800mm and 2000mm**
- Available in two widths of **525mm and 595mm**
- Available as **single or double** tubes

## Features

- Durable powder coated in white RAL 9016 paint for a brighter, whiter finish
- Available in our 9 colours
- Full 10-year warranty
- Manufactured and tested to BS EN 442

# SQUARA Hydronic & Electric\*

Thanks to its symmetrical square tubes, the Squara brings simplicity and calm to any bathroom.

With the Squasy (see page XX) as its counterpart, these bathroom radiators create a balanced combination of symmetry and asymmetry.

- Available in heights of **1120mm, 1360mm and 1840mm**
- Available in two widths of **500mm and 600mm**

## Colour options

- Gloss white (RAL 9016)
- Matt jet black (RAL 9005)
- Matt anthracite grey (RAL 7016)

## Features

- Provides plenty of space for drying towels
- Simple and user-friendly control
- Classic centre connection for easy installation
- Available in hydronic, electric and Dual Fuel Versions

Squara E in jet black

## Accessories

### 1. FCIR Remote (required for Dual-Fuel capability)

See accessories page 103

### 2. FCIR Heating Element (required for Dual-Fuel capability)

400w/600w/800w options available see accessories page 103

### 3. Various valves

For valve options see accessories page 103

#### \*Please Note:

Hydronic: Max Operating Temperature 95°C / Max Operating Pressure 8 Bar  
Electric: Protection Class I - 230 V / 50 Hz / IP X5

Electric products are fitted with a European style plug & power cable Refer to the instruction manual and consult with an installer to ensure product can be correctly installed prior to purchasing.

# ELLIPSE Hydronic & Electric\*

With its exceptional shape, the Ellipse is a true eye-catcher in any interior. This elliptical design bathroom radiator steps away from all standard contour lines and traditional profiles, and takes us to a completely new dimension in bathroom design.

The radiator is delivered with a practical towel holder.

- Available in two heights of **1390mm** and **1790mm**

## Colour options

- Matt white (RAL 9016)
- Matt jet black (RAL 9005)
- Matt anthracite grey (RAL 7016)

## Features

- Extremely flat design and oval shape bring variety to the room
- Thanks to the smooth surface, the Ellipse is particularly easy to clean
- Simple and user-friendly control
- Classic centre connection for easy installation
- Available in hydronic and electric versions

Ellipse E in anthracite grey

Product codes in bold are available from stock. Figuresse products are available in a 4 week lead time..

# General specification

Do we need to update this page to include mention of figuresse products?

## Material & Finish

Our radiators are manufactured from high quality steel, and are finished with Epoxy Polyester powder paint. Every radiator undergoes an intensive pre-treatment process to protect against rust.

## Quality

Our radiators are manufactured to ISO9001 Standards, achieving EN442 compliance and every product undergoes rigorous testing and quality control before they leave our factory.

## Packaging

Our radiators are supplied either in a heavy-duty reinforced cardboard box or wrapped in heavy duty polythene with top and bottom polystyrene box ends.

## Safety Precautions

Radiators are hot when in use, and as such, present a risk of burns to users on prolonged contact. The temperature of a radiator is dependent on the temperature of the system water, as set by the system installer or user. Installers and users should ensure that those who may come into close

proximity to hot radiators are aware of the risk of burns. Installers and users should take all necessary steps to minimise the risks of burns.

If the risk is significant, consideration should be given to installing low surface temperature radiators, or to placing guards in front of the radiators.

## Fixings

For the correct installation of radiators it is essential that the fixing of the radiator is carried out in such a way that it is suitable for intended use AND predictable misuse. A number of elements need to be taken into consideration including the fixing method used to secure the radiator to the wall, the type and condition of the wall itself, and any additional potential forces or weights that may happen to be applied to the radiator, prior to finalising installation.

IN ALL CASES IT IS STRONGLY RECOMMENDED THAT A SUITABLY QUALIFIED PROFESSIONAL INSTALLER OR SIMILAR TRADESPERSON CARRIES OUT THE INSTALLATION.

PLEASE NOTE: The fixing materials provided are only intended for installation on walls made of solid wood, bricks, concrete or on timber-frame stud walls where the fixing is into the timber. All walls being considered should have no more than a maximum of 3mm wall

finishing. For walls made of other materials, for example hollow bricks, please consult your installer and/or specialist supplier.

ONCE AGAIN, IF YOU ARE UNSURE, IT IS STRONGLY RECOMMENDED THAT A SUITABLY QUALIFIED PROFESSIONAL INSTALLER OR SIMILAR TRADESPERSON CARRIES OUT THE INSTALLATION.

## Application

Most PURMO products are for use on 2 pipe pumped indirect domestic and commercial central heating installations, with a maximum working temperature of 100°C. The system should be designed in accordance with BS EN 12828:2003 or BS EN 12831: 2003 as appropriate, with particular care taken to avoid air entry or water discharge.

We do not recommend the use of single feed indirect cylinders, as the possibility of aeration due to water interchange may lead to corrosion. The installation work must be carried out in accordance with recognised good practice, and precautions taken to avoid contamination which could lead to corrosion.

If a corrosion inhibitor or other water treatment is to be used, the Manufacturer's Instructions must be strictly followed.

The recommendations of BS 7593, Code of Practice for treatment of water in domestic hot water central heating systems, should be followed where appropriate.

When fitting any heat emitter in an extremely high humidity environment (for example a swimming pool area or sports changing facility) products manufactured from steel should be avoided.
