Confirmation of DGNB requirements for PURMO Group radiators

To whom it may concern;

we hereby confirm that only water-diluted products with a **VOC** (Volatile Organic Compounds) content of **< 140 g/l** are used for radiators from the Purmo Group with regard to powder coating and priming. All coatings are emission-free even in heating operation with the maximum permissible operating temperatures.

We also confirm that our radiators are primed and finished **without lead, cadmium or chromium VI compounds**.

Further certifications:

Environmental management **ISO 14001:2015**

Quality management system **ISO 9001:2015**

Purmo Group
