*2 years on electrical components

Scylla | Technical Data Sheet

Scylla

Figuresse Scylla is an electric towel warmer which design is inspired by a spear. Made of steel with minimalistic and timeless design however practical in everyday use. Well thought smart wall brackets make the installation easy and quick. Choose Scylla with plug for quick installation or hidden cable connection for clean aesthetic look of the bathroom. Chrome or black colour of the towel warmer will give fine finish look and fit perfectly along other appliances in bathroom. Scylla is controlled by push of the button with LED indicator and can work continually or according to 2h or 4h timer. The product includes 2-pole power switch with LED indicator.

Standards & Norms

- Protection Class I - 230 V / 50 Hz / Plug - IP21, Hidden cable connection – IP45
- CE certificate – Low Voltage Directive – EMC Directive
- Directive 2015/863, RoHS Directive
- Regulation 1907/2006/EC, REACH Regulation

Material

Scylla is made out of steel.

Colour

Scylla is available in two colours black and chrome.

Controller

Scylla is controlled by push of a button. Following working modes are available:

- Continually ON or OFF
- 2h or 4h ON, after OFF

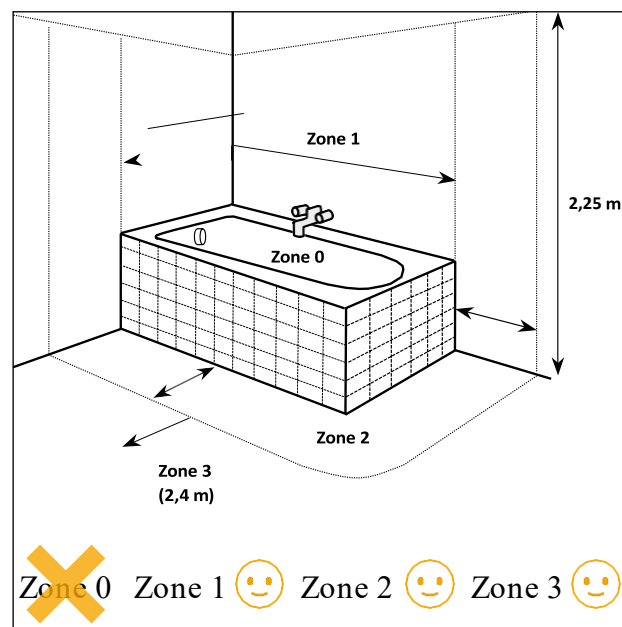

Controller and the 2-pole switch have LED indicators.

Installation

Scylla is available in two versions:

- Plug
- Hidden cable connection

The version with the plug provide quick installation but limits the product to the zone 2, at the same time cable connection will be exposed. The version with hidden cable connection allows to be installed in the zone 1, at the same time the cable connection is hidden, providing clean aesthetic look. However, the electrical connection of the towel warmer to the power supply should be carried out by a qualified electrician in accordance with current local and national electrical installation regulations.

Scylla | Technical Data Sheet

Scylla is equipped in “smart” wall brackets which stick to the wall allowing to quick and easy locate the mounting position and minimize the risk of fail installation of the product. The “smart” brackets allow to repeated the preparation process for installation of the product in case of mistake.

Packaging & Protection

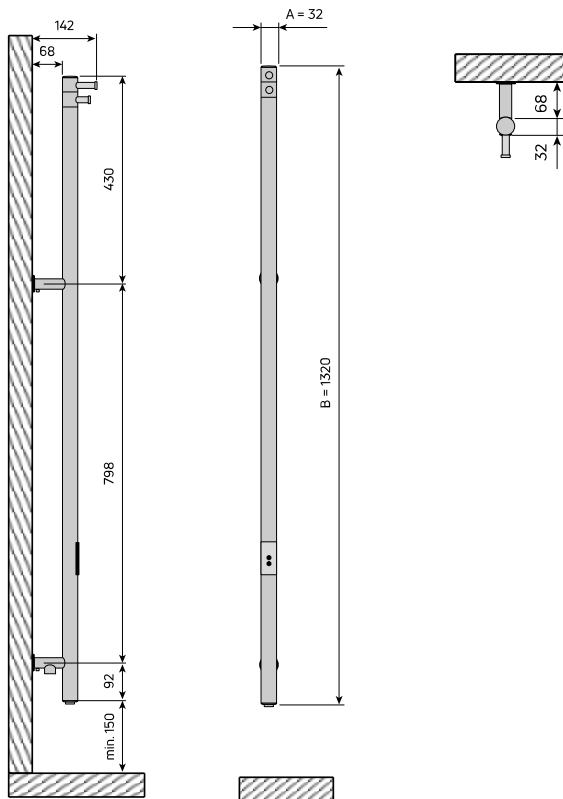

The radiators are packed individually in cardboard, reinforced with corner segments. The whole cardboard box is shrink-wrap. The packaging remains around the radiator until it is mounted, in order to prevent damage.
